

# Siebel Open UI Essentials Ed 2

**CODICE**

D84413GC20

**DURATA**

5 Giorni

**PREZZO**

2.500,00€ (iva escl.)

**LINGUA**

Italiano

**MODALITÀ**

Virtual Classroom  
Corso in aula

**SCHEDULAZIONE**

- A Richiesta

**PREREQUISITI****Audience**

Application Developers  
Configuration Consultant  
Configuration Implementer  
Developer  
Support Engineer  
Technical Consultant

**CONTENUTI**

Siebel Open UI Client  
Proxy  
Presentation Model (PM)  
Physical Renderer (PR)  
Plug-in Wrappers (PW)  
Cascading Style Sheets (CSS)  
Manifest Administration  
Manifest Files  
UI Objects  
Default Behaviors  
Object Expressions: Multiple and Complex Conditions  
Siebel Open UI JavaScript API  
Classes  
Objects  
Namespaces  
Functions

Files and directories  
Siebel Web Templates  
JavaScript files and controls  
Images  
Metadata  
Runtime data  
Styling  
Cascading Style Sheets (CSS files)  
Themes  
Styling Rules  
Presentation Model (PM) for Form Applets  
AddMethod  
Init  
Get  
ExecuteMethod  
FieldChange  
ShowSelection  
GetFieldName  
GetName  
Physical Renderer (PR) for Form Applets  
BindData  
GetPM  
GetInputName  
PM to PR Interaction  
AddMethod  
AddProperty  
AttachPMBinding  
Get(propertyName)  
PM and PR for List Applets  
Get("GetRecordSet")  
BindData(bRefresh)  
ShowUI  
Helper Techniques  
Plug-in Wrappers: ShowUI, GetEI, AttachPW  
EventHelper  
HTML Template Manager  
Responsive Web Pages  
Non-Applet Customizations  
AddListner  
postload  
Using External Code  
Third-party libraries

Migrating Customizations

**Description:**

This Siebel Open UI Essentials training begins by introducing you to the Siebel Open UI user interface and architecture. The second part of the course dives into the application programming interface (API).

Learn To:

Administer Siebel Open UI customizations.

Customize applets using the Siebel Open UI JavaScript API as well as the overall look-and-feel of the application.

Use debugging techniques to troubleshoot coding problems.

Use Siebel Tools in conjunction with the JSAPI, as well as to customize Siebel Open UI behavior.

Migrate customizations.

Benefits to You

By investing in this course, you'll walk away with the ability to use the JavaScript API. You'll develop the skills to write code to address common customization requirements including using external, third party libraries; you'll also develop an understanding of when and where to add code (the hooks into the framework) and common methods to use for desired outcomes. This bundled course consist of two courses: Siebel Open UI Foundations and Siebel Open UI Advanced JavaScript API.

Understand the Open UI Framework

This section of the course provides foundational knowledge to understand the architecture and administration techniques.

Using the JavaScript API

In this section you use the API to control the look and behavior of the Siebel application.

Learn Through Hands-On Exercises

Expert Oracle instructors will demonstrate how to use the new architecture through a series of examples. Please note that this course does not teach JavaScript, CSS or HTML. It's recommended that you have a background in Siebel Tools.
