## **CONTENUTI**

Examining Native Reporting

Using Native Reporting as Report Consumers

Using Native Reporting as Report Authors

Starting with Taleo  
Using BI Publisher  
Building Charts and Tables in BI Templates  
Creating Calculations in BI Templates  
Uploading BI Templates into Taleo

**Description:**

NOTE: This course is for Taleo Performance ONLY and assumes that you have successfully completed downloading

and installing the BI Publisher Desktop plug-in as an essential requirement of the hands-on activities in the course.

Based on your organizational guidelines, you must complete this task as soon as possible, but no later than the course start date. Copy and paste the following URL into your browser to access the download and instructions.

<http://www.oracle.com/technetwork/middleware/bi-publisher/downloads/index.html>

This Taleo (TEE): Native Reporting with BIP for Taleo Enterprise training puts you and your team on the right path to creating, modifying and sharing both standard, and custom reports. Turn on the capabilities of BI Publisher and Taleo Performance in this introductory course for beginner native report authors.

This course is appropriate for Oracle Cloud deployments.

Learn To:

- Understand the layout of the Native Reporting solution.
- Use the Native Reporting solution's key functionalities and principal tools.
- Access and run standard native reports.
- Scope native reports.
- Retrieve data samples for custom native reports.
- Build native reports.
- Import customized native report templates into Taleo Performance.

A Note to Business Object Users

To use BI Publisher, the 64-bit platform and Java 7 must be installed, which causes issues with Business Objects. A large portion of the Java and bit-wise dependency is placed on the OS and the Office components. The JRE package that is to be installed has to conform with the OS and MS office installation. Thus, at this time, Taleo cannot support both

platforms simultaneously unless end users install and uninstall Java each time they switch from application to application.
