PREREQUISITI

Oracle HCM Cloud: Global Human Resources

Oracle HCM ?????????????? - WDP

Audience

End Users

Implementation Consultant

OBIETTIVI

Use Oracle Fusion Functional Setup Manager (FSM) to implement Time and Labor

Identify the key concepts of Time and Labor that determine a successful implementation

Validate your setup by entering data and performing common Time and Labor processes

Use Oracle Fusion Time and Labor to perform transactional tasks, such as reporting, approving, and transferring time

CONTENUTI

Oracle Fusion Time and Labor

Lesson and Course Objectives

Course Methodology

Course Hands-On Activities, Introduction, and Sign Ins

Oracle Fusion Resources

Oracle Fusion Workforce Management and Time and Labor

Oracle Fusion Human Capital Management (HCM): Overview

Workforce Management Common Components

Data Dictionary Setup Task

Common Components: Repeating Time Periods

Time and Labor Management: Overview

Functional Setup Manager: Overview

Time and Labor Integrations

Absence Management with Time and Labor: Overview

Global Payroll with Time and Labor: Overview

Project Costing with Time and Labor: Overview

Repeating Time Periods and Time Consumers Set

Repeating Time Periods: Overview

Time Consumer Sets: Overview

Processing Profile Links Consumer Set to Worker

Layout Sets

Time Card Display Options Using Layout Sets

Delivered Layouts

Delivered Projects Time Card Matrix

Delivered Payroll Layout Set: Time Card Matrix for Time Entry Layout

Filtering the Project List by Team Membership

Time Entry Profiles Link Layout Set to Workers

HCM Groups

HCM Groups: Overview

Defining Group Membership

Creating Group Membership Conditions

Embedded Group Priority

Individual Assignment Priority

Refreshing and Locking Memberships

Group Membership Evaluation

Assigning Setup Profile Configurations to Groups

Time Entry and Time Processing Profiles

Worker Profiles: Overview and Types

Delivered Projects Time Entry and Time Processing Profiles

Profile Association with Workers

Profile Priority for Resolving Multiple Group Memberships

Worker Profile Derivation: Example

Troubleshooting Time Card Profile Assignments

Compare Profiles

Setup Profile Components

Project Time Entry, Approval, and Transfer

Time Entry Options for Workers

Time Entry Options for Managers

Time Approval Flow

Time Card Approval Components

Approval Rules for Oracle Fusion Project Costing

Adjusting Approved Time

Time Transfer: Overview

Transfer Error Resolution

Custom Time Attributes
Time Attributes: Overview
Delivered Time Attributes
Custom Time Attributes: Overview
Time Entry Profile Components- With Custom Attributes
Creating Custom Time Attributes, Value Sets, Values, and Attribute Category
Time Reporter and Administrative Data Sources
Transferring Time Card Entries With Custom Time Attributes
Payroll Time Card Fields
Time Card Fields: Overview
Relationships: Time Attributes, Time Card Fields, Layout Sets, Setup Profiles, and Groups
Time Card Field Types
Time Card Field Data Sources
Time Entry Data Sources with Filter Variables
Time Card Field Default Value Population Methods
Dependent Time Card Fields and their availability in Layout Sets
Configuring Time Card Fields for US Location Overrides
Time Rule Templates, Rules, and Rule Sets
Bringing Together Formulas, Rule Templates, and Rules
Delivered Rule Templates
Configuration Options for Time Entry and Time Calculation Rule Templates
Rule Template Summation and Reporting Levels
Time Entry Rule Template: Suppress Duplicate Message Display
Processing Order for Time Calculation Rule Sets
Processing Profile Links Rule Set to Worker
Analyzing Rule Processing Details
Multiple-Attribute Time Card Fields
Multiple-Attribute Time Card Fields Overview
Multiple Attribute Definition Structure
Multiple-Attribute Dependent Time Card Field Definition
Dependent Time Card Fields: Definition
Relationships: Time Card Fields, Layout Sets, Setup Profiles, and Groups
Time Category
Time Categories: Introduction and Usage
Time Category Condition Components
Compound and Grouped Conditions
Time Repository Data Uploads and Extracts
Using HCM Extracts for Time Repository Data
HCM Extract for Time Data
Extract Data Groups
Data Group Connections
Building Data Group Hierarchy for Reported and Calculated Time

Extract Records and Attributes
Display Filters
Reporting Payroll Time
Entering Time Using Time Card
Editing and Submitting the Saved Time Card
Adjusting the Time Entries on a Time Card
Approving Time
Transferring Time to Global Payroll

Description:

This Fusion Applications: Oracle HCM Cloud Time and Labor training teaches you how to implement, configure, and use

Time and Labor for your enterprise. Learn how to report, approve, and transfer time. Explore the Time and Labor setup and time reporting tasks through lectures, discussions, demonstrations, and hands-on activities.

Learn To:

Create time period definitions that produce repeating periods.

Create time attributes, which are qualifiers associated with a time event or time entry.

Create time card fields, which are a collection of properties that enables different user groups to report time against different time attribute values.

Create a collection of different time entry layouts for entering, reviewing, and approving time. Associate time card fields

with layout sets.

Create groupings of time attributes as categories. Use these categories to group time entries for summarizing, validating, and transferring time and for processing time rules.

Create time consumer sets that specify approval periods, validation rules, and time transfer rules for each time consumer.

Create group definitions that are used by Time and Labor.

Create worker setup profiles that associate time entry configurations with workers.

Benefits to You

By taking this course, you can ensure a smooth, rapid implementation of Fusion Time and Labor. You'll develop a better

understanding of the configuration options so you can make improved decisions during your implementation.

Security for Oracle Fusion HCM & Oracle Fusion Functional Setup Manager

Learn how Oracle Fusion uses job and data roles, role inheritance and security privileges to secure application functionality and data access. You'll also use Oracle Fusion Functional Setup Manager to plan, configure and implement

Time and Labor.

Oracle Fusion Time and Labor Implementation

Configure and manage repeating time periods, time consumer sets, time categories, time attributes, time card fields, layout sets, rules, setup profiles, and groups.

Test Your Implementation

Enter and submit time as a worker, approve time as a manager, and transfer time as a time consumer.

Please Note

This course is relevant for any customers using Fusion Applications through Release 11.1.10. It's beneficial for both Oracle Cloud and on-premises deployments.
