**Description:**

This Oracle FLEXCUBE Universal Banking Lending 12.0.3 training is designed to help you gain insight into the business domain with respect to the processing of lending and related type transactions. Expert Oracle University instructors take you through a step-by-step guide to delivering fast and efficient product set-ups, transaction inputs and processing operations in a bank's lending section.

**Learn To:**

Segregate between 'Day Zero' maintenances and other maintenances.

Understand the functional architecture and design used in the lending modules set of Oracle FLEXCUBE.

Create lending products based on different offerings of the bank, successfully.

Understand the linkages of other modules with the lending set of modules.

Set up the module specific maintenances.

Create a product and restrict the number of products to an optimal level.

Create lending transactions along with other operations like manual liquidation, manual disbursement and value dated amendments from the bank user's point of view.

**Benefits to You**

By taking this course, you'll develop the skills to learn about and create diverse types of loan products used by banks across the globe. You'll develop a deeper understanding of consumer lending, loan collections, loan securitization, loan origination, credit line origination and intermediaries modules. These Oracle FLEXCUBE modules are very dynamic and let you parameterize every component that may be required in the lending lifecycle.

**Benefits to You**

By participating in theory and labs sessions, you'll develop hands-on expertise handling common business scenarios. You'll possess the knowledge and skills to become a member of the task force, which would deploy the lending suite of products for a bank.

**Please Note**

Minimal steps are required for bank users to complete the lending transactions, as all common attributes are already defined as part of the product setup.
