Setting up Products

Description:

This Oracle FLEXCUBE Universal Banking Trade Finance 12.0.3 training is designed to help you gain insight into Oracle FLEXCUBE Universal Banking's 'Trade Finance' modules, which include letters of credit, bank guarantees, bills and collections and trade origination. Get a step-by-step guide to effectively deliver fast and efficient product setups, create contracts and process operations in a bank's 'Trade Finance' department.

Learn To:

Understand the uniform functional architecture and design used across functional modules.

Set up the module specific maintenances.

Create a product and restrict the number of products to an optimal level.

Create import LC, export LC, bank guarantee, import bills, export bills processing and provide as different offerings of the bank.

Understand the linkages of 'Trade Finance' modules with other modules of Oracle FLEXCUBE.

Perform LC advising, LC confirmation, guarantee issuance, guarantee advising and availment of guarantees.

Create import bills, export bills and reimbursement of trade transactions.

Perform LC amendment, LC transfer, registration of bills and bill amendment from the bank user's point of view.

Benefits to You

By participating in extensive hands-on lab exercises, you'll develop the knowledge and skills to implement different requirements and services that a bank may have, in a simulated environment. These hands-on exercises reinforce the concepts and functions you explore during the interactive instruction portion of the course.

Please Note

Minimal steps are required to complete the 'Trade Finance' transactions, as all common attributes are already defined as part of the product setup.
