- A Richiesta

PREREQUISITI

Oracle Financials Cloud: Enterprise Structures and GL Impl

Audience

Business Analysts

Implementation Consultant

OBIETTIVI

Discuss the common applications configuration for Receivables to Collections

Identify the key concepts of Oracle Fusion Financials Offering that determine a successful implementation

Learn the major implementation components for Oracle Fusion Tax

Learn how to use Oracle Functional Setup Manager to implement Oracle Fusion Subledger Accounting

Learn the major implementation components for Receivables

Learn the major implementation components for Oracle Fusion Payments for Receivables

Learn the major implementation components for Oracle Fusion Cash Management

Learn the major implementation components for Oracle Fusion Advanced Collections

CONTENUTI

Oracle Financials Cloud: Receivables to Collections Implementation Overview

Explain Oracle Fusion implementation resources

Understand the course schedule

Discuss Oracle Financials Cloud Applications

Understand the key features of Receivables to Collections

Introducing Oracle Fusion Navigation

Navigate Oracle Fusion Applications

Explore dashboards

Examine panels

Review infolets and infotiles

Introducing Functional Setup Manager

Describe Oracle Fusion Functional Setup Manager

Browse and configure offerings and functional areas

Review the Oracle Fusion Financials offering

Review the reports associated with the Oracle Fusion Financials offfering

Create an implementation project

Explain setup data export and import

Overview of Security

Understand the Cloud security methodology

Plan your use of the security implementation

Identify the components of data security and tasks associated with these components

Discuss how roles can be assigned automatically or manually to users

Explore the new Security Console to customize users

Review the audit reports and resources

Enterprise Structures and Ledgers Overview

Understand enterprise structures

Describe reporting structures setups

Understand ledgers

Undestand Rapid Implementation tasks

Configuring Business Units and Reference Data Sets

Explain Business Unit features

Discuss business unit considerations

Define business units

Explain reference data sets and business functions

Discuss reference data sharing

Configuring Oracle Fusion Receivables for Transactions

Understand the key concepts in Oracle Fusion Receivables for transactions

Understand how the Rapid Implementation spreadsheet created setups for Receivables

Understand the required setups for transactions and revenue management

Explain the optional setups for transactions and revenue management

Customers

Understand the customer model

Discuss customer profile classes

Create a customer

Configuring Oracle Fusion Tax

Describe Oracle Fusion Tax as a centralized tax solution

Use the Rapid Implementation spreadsheets

Explain how tax is calculated on transactions

Explain foundation tax configuration

Explain advanced tax configuration

Explain tax reporting configuration

Test and valide your tax configuration

Recivables Invoices Overview

Describe the key features of processing transactions

Explain how to input invoices manually

Discuss the key concepts of the autoinvoice process

Configuring and Using Subledger Accounting

Explain the role of accounting methods in the Create Accounting process

Understand the key features of accounting methods

Configure and manage accounting methods

Discuss the Create Accounting process

Undestand manual journal entries and adjustments

View the created journal entries

Configuring Customer Receipts and Payments for Funds Capture

Understand Customer Receipts

Describe funds capture payment methods

Manage funds capture process profiles

Explain internal payees and routing rules

Define system security options

Configuring Oracle Fusion Cash Management

Understand the key features of Cash Management

Define banks, branches, and accounts using the Rapid Implementation process

Configure bank statement processing and reconciliation

Perform automatic reconciliation

Describe the new features for R11

Configuring Oracle Fusion Advanced Collections

Set up and maintain Collections

Define aging, collectors, and dunning

Define Collections preferences

Manage strategy tasks and strategies

Manage scoring data points and formulas

Configure notes

Describe the Advance Collections Matrix

Reporting for Receivables, Advanced Collections, Cash Management, and Tax

Understand and run reports for Receivables

Run Advanced Collections reports

Understand Cash Management reports

Describe Tax reports

Description:

This Oracle Financials Cloud: Receivables to Collections Implementation training teaches you the steps needed to

implement Oracle Fusion Receivables to Collections. Expert Oracle University instructors will teach you how to follow

the Financials offering task list in Oracle Fusion Functional Setup Manager.You will also test your setups.

Learn To:

Identify the key concepts of Oracle Financials Rapid Implementation that determine a successful implementation.

Use Oracle Functional Setup Manager (FSM) to implement Oracle Receivables to Collections.

Understand integration points, implementation considerations.

Set up Tax, Subledger Accounting, Receivables, Cash Management, Advanced Collections, and related products to support the financial flows.

Test your setups by creating an invoice, receiving a payment, and reconciling the payment with a bank statement.

Benefits to You

Ensure a smooth, rapid and successful implementation of Oracle Fusion Receivables to Cash. Taking this course will help you better understand the configuration options so you can make improved decisions during your implementation. You'll walk away with the skills to optimize the set up so that you can effectively manage your financial processes. Investing in this course also gives you access to hands-on labs where you can apply your new knowledge to solving issues you encounter on the job.

Working with Oracle University instructors, you'll learn from experts who have a deep understanding of how this technology works.

Please Note

This course is relevant for any customers using Fusion Applications through Release 11.1.11. It's beneficial for both Oracle Cloud and on-premises deployments.
