- A Richiesta

PREREQUISITI

Oracle SCM Cloud: Supply Chain Management Foundation

Suggested Prerequisites

Oracle SCM Cloud: Order Management and Fulfillment Cloud Implementation

Audience

CIO/CTO

Cloud Administrator

Cloud User

Configuration Implementer

End Users

Functional Implementer

Implementation Consultant

OBIETTIVI

Explain consigned inventory flows, including how to manage and purchase consigned inventory

List the setup tasks required to support consigned inventory flows

Explain how contract manufacturing works, and perform setup tasks to support contract manufacturing

Describe the return process flow and list the setup steps required to support internal material transfers

CONTENUTI

Advanced Supply Chain and Fulfillment Techniques Overview

Advanced Supply Chain and Fulfillment Techniques course content

Overview of Oracle Supply Chain Orchestration Cloud capabilities

Overview of Supply Chain Orchestration

Supply Chain Orchestration Overview
Supply Chain Orchestration Business Processes Flows
Automated Change Management
Key Setups in Supply Chain Orchestration
Setup Summary
Accessing Setup Tasks
Scheduling ESS to Process Supply Requests
Tracking Supply Orders in Supply Chain Orchestration
Track progress of supply creation in Supply Chain Orchestration (SCO)
Resubmit stuck orders
Overview of Back-to-Back Supply Creation and Fulfillment
Back-to-Back Process
Back-to-Back Fulfillment of Standard Items
Back-to-Back Fulfillment: Buy
Back-to-Back Fulfillment: Make
Back-to-Back Fulfillment: Transfer
Back-to-back Fulfillment: On-Hand Supply
Set Up Back-to-Back Supply Creation and Fulfillment: Section 1
Participating Cloud Applications
Back-to-back Setup Details: Product Management
Back-to-back Setup Details: Global Order Processing
Back-to-back Setup Details: Business Rules and Processes
Back-to-back Fulfillment Flow Practice
Change Management in Back-to-Back Supply Creation and Fulfillment
Overview of Drop Ship
Overview of drop ship
Drop ship required components
Drop Ship Setup
Drop ship setup features
Drop ship setup tasks
Drop Ship Execution
Drop ship integration points
Fulfillment line statuses
Drop Ship Change Management
Drop ship change sources
Drop ship change processing
Drop ship change limitations
Overview of Internal Material Transfers
Overview of internal material transfer
Internal material transfer process flow
Internal Material Transfer Management
Transfer order sources

Internal material transfer orchestration
Internal material transfer planning and execution
Internal Material Transfer Returns
Return transfer order process flow
Physical and accounting returns
Overview of Consigned Inventory
Overview of consigned inventory
Consigned inventory process flow
Purchasing Consigned Inventory
Consigned inventory process flow
Consignment agreement
Consignment order
Supplier site setup
Purchasing setup
Consigned Inventory Management
Consigned inventory process flow
Consigned inventory receipt
Consigned inventory tracking and availability
Consumption transactions
Consumption advice
Inventory counting and reconciliation
Return to supplier
Consigned Inventory Supplier Collaboration
Consigned inventory process flow
Consigned inventory in Supplier Portal
Consigned Inventory Payables Matching
Consigned inventory process flow
Consumption advice payables matching
Consigned inventory setup
Consigned inventory reports
Overview of Contract Manufacturing Solution
Key Capabilities and Benefits
Modeling of Entities
Business Flow
Process Flow
Contract Manufacturing Solution Application Setup: Section 1
Setup Summary
Supplier and Supplier Site Setup
Contract Manufacturing Inventory Organization Setup
Product Information Management Setup
Planning Central/Order Promising Setup
Business Rules and Processes Setup

Back-to-Back Flow in Contract Manufacturing Solution

Description:

This Oracle SCM Cloud: Advanced Supply Chain and Fulfillment Techniques training teaches you how advanced fulfillment options are seamlessly integrated across the Oracle Cloud. You will learn how integrated end-to-end business flows are enabled cross-product solutions to meet advanced supply chain processes.

Learn To:

Explain concepts of Advanced Supply Chain and Fulfillment techniques.

Demonstrate key setup steps in Supply Chain Orchestration.

Explain back-to-back supply creation and fulfillment.

Explain and leverage the Contract Manufacturing solution.

Manage drop ship change.

Manage internal material transfer.

Implement fulfillment options with new and enhanced Oracle Cloud orchestration architecture.

Benefits to You

Taking this course will teach you how to ensure a smooth and successful implementation of your Supply Chain Management Cloud applications. This training will not only help you better understand the core implementation tasks required to set up your applications; expert Oracle University instructors will also deep dive into the core functionalitiwa and how they can benefit your entire enterprise.

Instructional Approach

Each lesson in this course begins with your instructor presenting important concepts related to the functional setup or functionality of Oracle SCM Cloud.

Lessons may also require you to do one or more of the following:

Complete a portion of the setup in the application.

Discuss key setup decisions and best practices.

Complete a knowledge assessment quiz.
