The Prisma Access SASE Security: Design and Operation (EDU-318) course describes Prisma Access Secure Access Service Edge (SASE) and how it helps organizations embrace cloud and mobility by providing network and network security services from the cloud. This course is intended for people in the fields of public cloud security and cybersecurity, or for anyone who wants to learn how to secure remote networks and mobile users.

Duration: 4 days

PREREQUISITI

Participants should have a basic knowledge of cloud computing and the public cloud. Participants must complete the Firewall 9.1 Essentials: Configuration and Management course and the Panorama 9.1: Managing Firewalls at Scale course or have equivalent experience.

Participants also must have experience with networking concepts including routing, switching, and IP addressing.

OBIETTIVI

Successful completion of this four-day, instructor-led course will help enhance your understanding of how to better protect your applications, remote networks, and mobile users using a SASE implementation.

You will get hands-on experience configuring, managing, and troubleshooting Prisma Access in a lab environment.
